

# Capacity Building

Jean-Yves Garnier

Hosted by Government of India with the support of Joint Organisations Data Initiative (JODI) partners

Capacity Building is much more than training and includes the following

- Human resource development, the process of equipping individuals with the understanding, skills and access to information, knowledge and training that enables them to perform effectively.
- Organizational development, the elaboration of management structures, processes and procedures, not only within organizations but also the management of relationships between the different organizations and sectors (public, private and community).
- Institutional and legal framework development, making legal and regulatory changes to enable organizations, institutions and agencies at all levels and in all sectors to enhance their capacities.

Why is Capacity Building Needed ?

The issue of capacity is critical and the scale of need is enormous, but appreciation of the problem is low.  
 The link between needs and supply is weak.  
 There is a lack of realistic funding.  
 There is need for support for change.  
 Training institutions are isolated - communications are poor.  
 Development of teaching materials is inefficient.  
 Alternative ways of capacity building are not adequately recognized.

Who are the Clients ?

The needs for capacity building are always changing. There are no ready solutions, and any programme must be appropriate for the local situation and organization.

Local government, communities and NGOs are the main clients, but central government and the private commercial sector also need support. Community groups, often with strong NGO support, need to improve their capacity to plan, organize and manage their neighbourhoods. Departments of local government play an increasingly important role in enabling community groups to enhance their

## Online tutorial(?)

23 – 25 March 2015, Vienna, Austria  
Energy Community Secretariat

## AGENDA

### Day 1: 23 March 2014

10:00 **Welcome Address**

14:45 – 15:15 **Coffee Break**

15:15 – 16:00 **Extending JODI to Natural Gas**  
Fuad Al Zayer, IEF

**JodiOil JodiGas** 23 – 25 March 2015, Vienna, Austria

13:30 – 14:00 **Current data situation and availability for JODI-Gas questionnaire in East European Countries**

Eurostat, IEF, UNSD  
- Issues and suggested solutions

14:00 – 15:00 **Exercise to fill the JODI-Oil/Gas Questionnaire**

Eurostat, IEF, GECF, OPEC, UNSD  
- Where to find the data (oil company surveys, trade data, administrative data sources, estimates...)  
- What to include in production of crude/NGLs etc?  
- How to treat output from gas plants  
- Common mistakes  
- Checks on the data

15:00 – 15:30 **Coffee Break**

15:30 – 16:30 **Hands-on Exercise Using Participating Countries' Monthly Oil/Gas Data\***

Yuichiro Torikata, IEF  
- Filling participating countries' data into the JODI-Oil / JODI-Gas questionnaires

*\*Participants are asked to bring their original data which can be used to fill in the JODI questionnaire, the questionnaire filled with the data and a diagram that explains what the data sources are (Please refer to the attached JODI-Oil / JODI-Gas diagram template).*

16:30 – 17:30 **Hands-on Exercise Using Participating Countries' Monthly Oil/Gas Data (Continue)**

### Day 3: 25 March 2014

9:00 – 10:00 **Increasing Energy Data Transparency**  
Stève Gervais, IEA

10:00 – 11:00 **How to gather relevant data from oil and gas supply chains? – Introduction of initiatives by Oslo Group on Energy Statistics.**  
Alex Blackburn, UNSD

11:00 – 11:30 **Coffee Break**

11:30 – 12:00 **Wrap up Session**

### JODI-Gas Manual

### Tools

Assessment sheets used by IEA and IEF

Availability for JODI-Oil Questionnaire in East European

## 6<sup>th</sup> JODI Training Workshop for Latin American countries, 26-28 July 2010, Bogota, Colombia

Do you feel more comfortable with the filling of JODI questionnaire and conducting data quality assessment on regular basis?

Will this workshop improve your submission of accurate, complete and timely JODI questionnaires?

Do training sessions really translate in data quality improvements?

**Resources**

**Timeliness**

**Quality**

**Confidentiality**

**Transparency**

## Is there a gap between expectations from Ministers and Leaders and the ability of participants in the Initiative to deliver results?

Ministers expect full transparency but actions do not follow words: lack of resources, confidentiality, etc. 90% of transparency achieved but the last 10% needs more support from Ministers not less.

## What can be done to bridge the gap?

The ball is currently more in the Policy makers' field than in the technical support people. JODI has been built based on three pillars: policy makers, statisticians, and industry/analysts.

Policy makers have to be alerted on the need for more effort to meet the initial target of full transparency. Starting with G20 countries who need to show the example. Need to identify “*champions*”.

## Can the industry play a role, or is this purely a government issue?

Industry is both the source of data and one of the main users. So the importance of their involvement. As well as Analysts too.

More regular meeting statisticians-industry-analysts.

Training of trainers approach (country-region).

Thank you
