User Experience: The Ideal Use of JODI

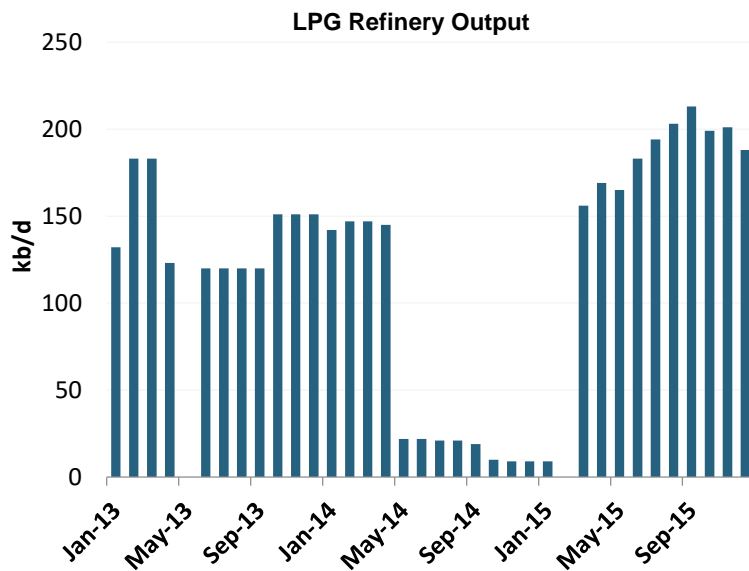

User Experience: What Benefits does JODI Provide?

User Experience: Problems Remain

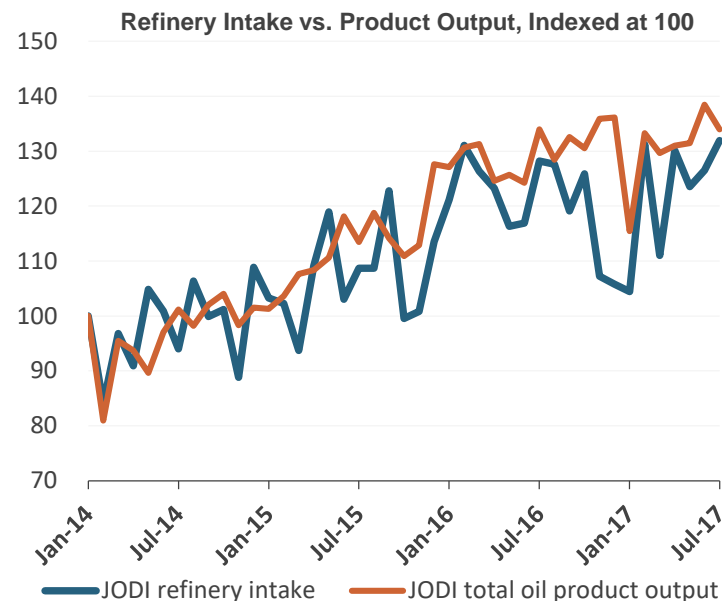

User Experience: Two Examples

Example 1: Statistical Inconsistency

- Levels are far above what refinery output could be.
- Significant m-o-m changes clearly data error.
- No explanation given.
- There are similar cases for other products.

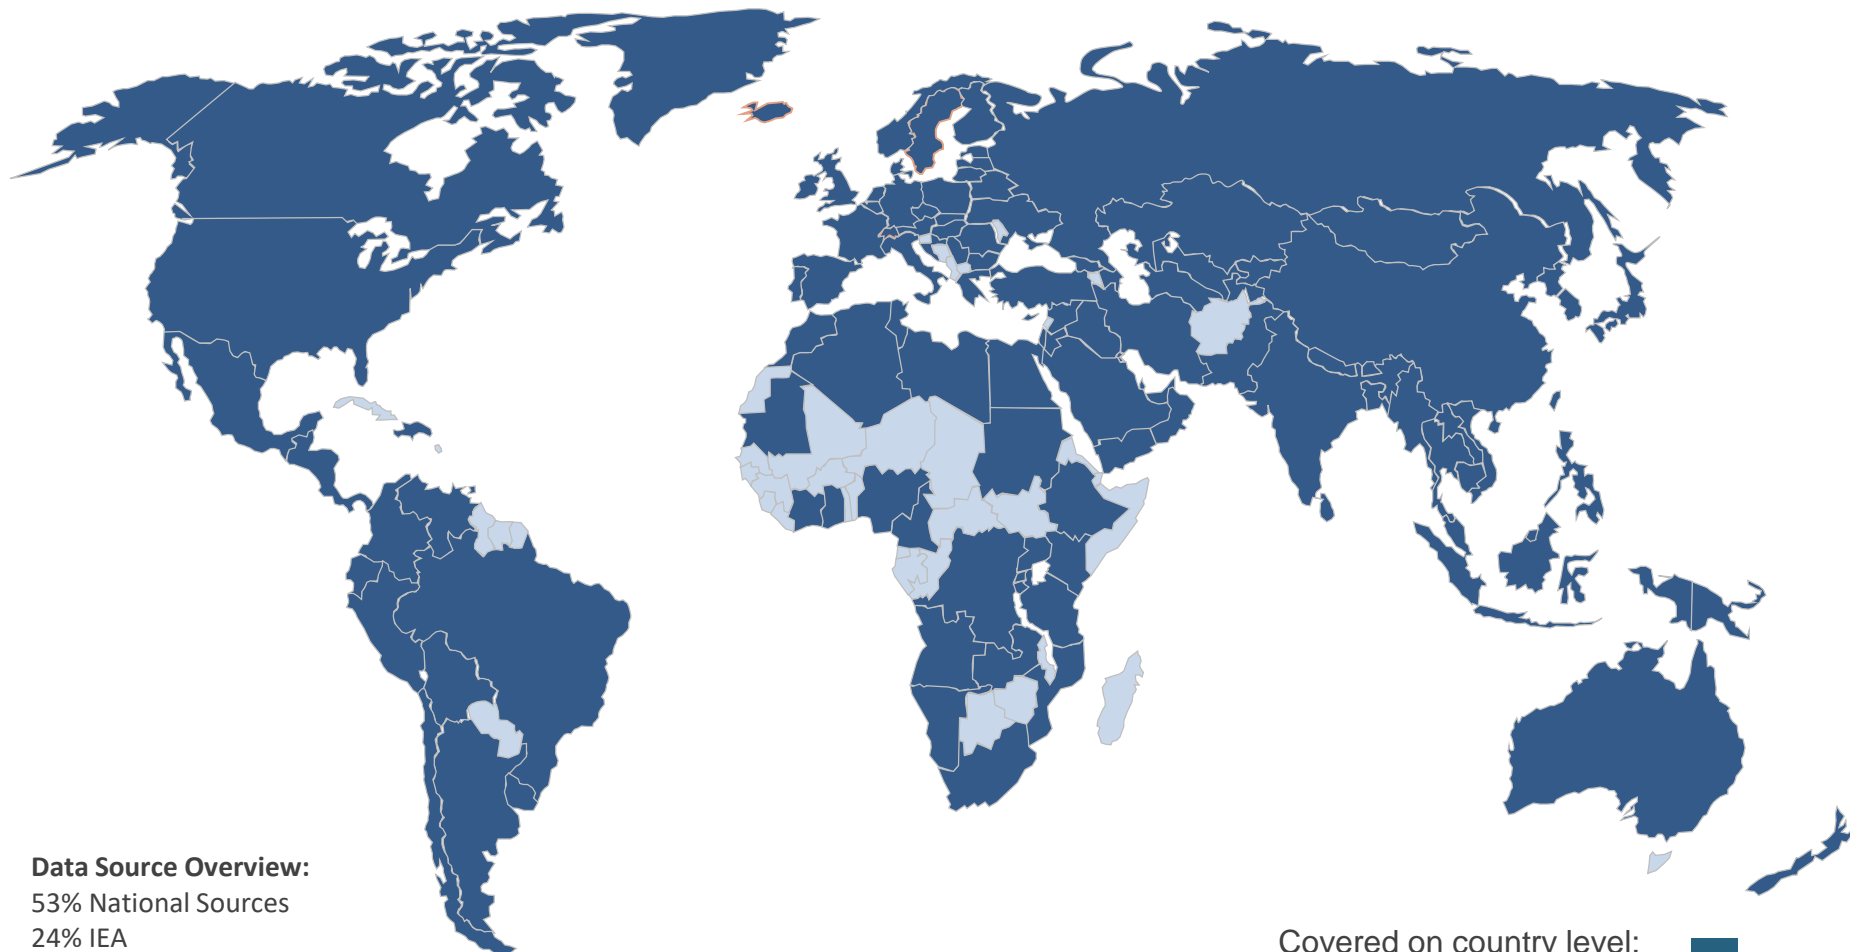

Example 2: Misclassified/Missing Data

- No consistency between intake and output.
- Refinery run figures are incomplete/unclear (is condensate included?)
- Statistical inconsistency in 'other product' category.
- In this case, naphtha is classified as other. We make use of other national source.

Data-centric Approach, based on Regional/Country Detail

Currently 117 countries covered separately, accounting for over 98% of world oil demand

Data Source Overview:

53% National Sources

24% IEA

4% JODI

18% Mixed (JODI and other 3rd parties)

JODI mainly used for cross-checking

Covered on country level:

Covered on regional level:
