

JODI Gas: Report on Data Reporting, Dissemination through the Beta Testing

United Nations Statistics Division
3rd Gas Data Transparency Conference
4-5 June 2013, Bali, Indonesia

Outline

- JODI Gas reporting to UNSD
- What has changed since the 2nd Gas Data Transparency Conference (May 2012)
- Initial findings from Beta Testing

JODI Gas reporting to UNSD

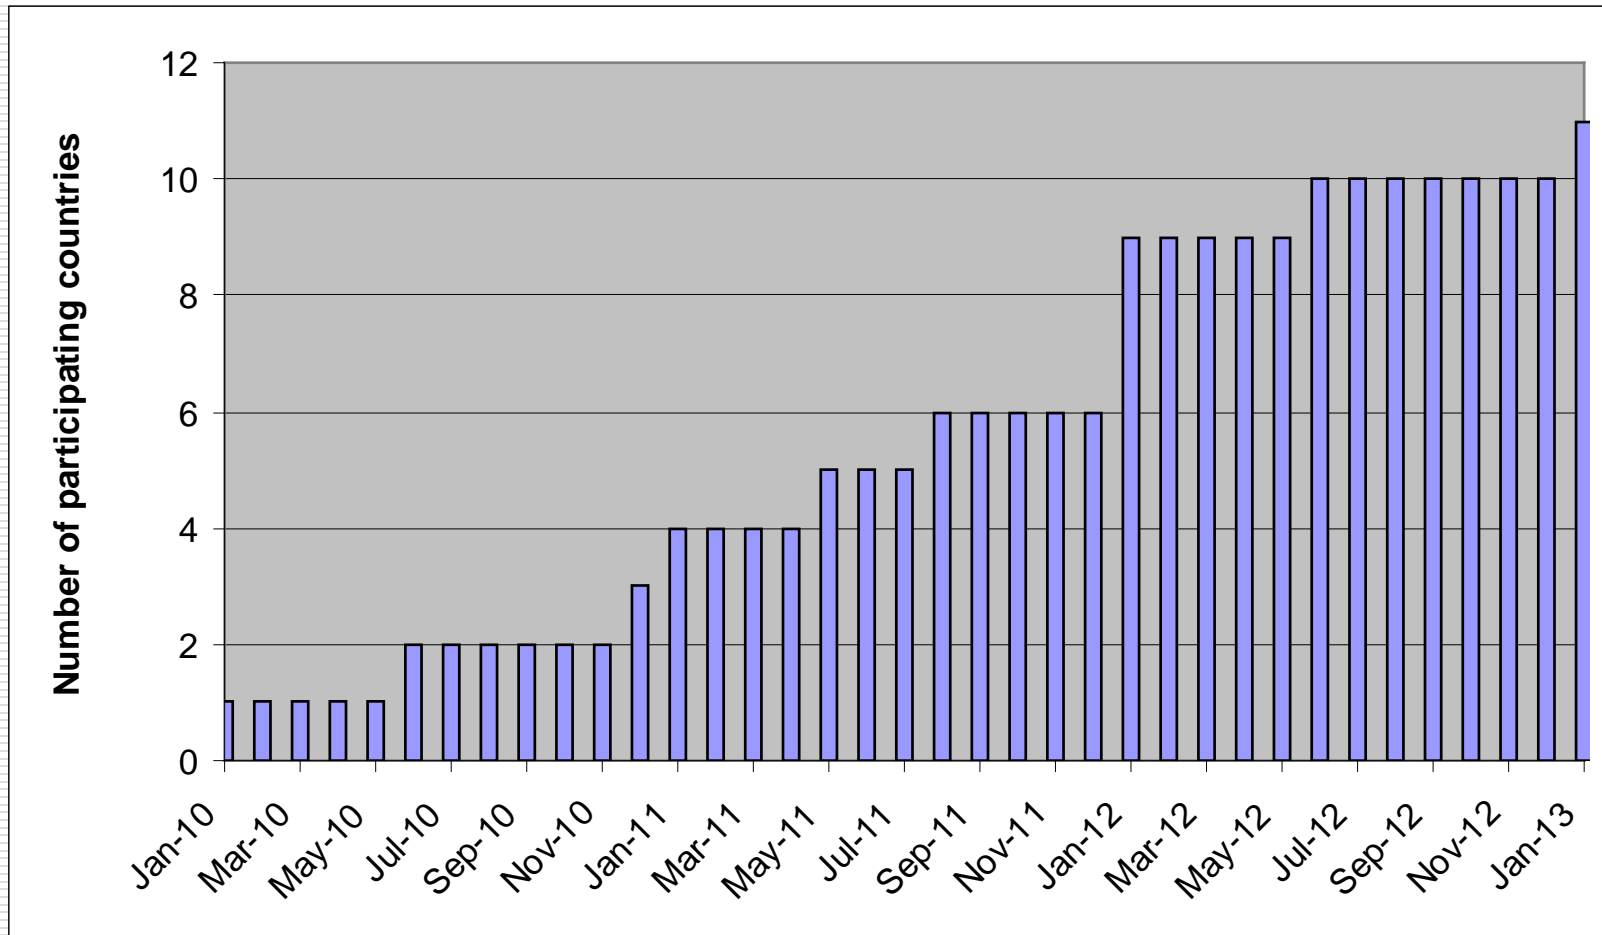

UNSD is currently collecting JODI Gas from 11 countries

- Azerbaijan
- **Bangladesh**
- **Bahrain**
- **Belarus**
- **Egypt**
- **Georgia**
- India
- Myanmar
- South Africa
- Tunisia
- Ukraine

Since the 2nd Gas Data Transparency Conference in 2012, five new countries started to report JODI Gas

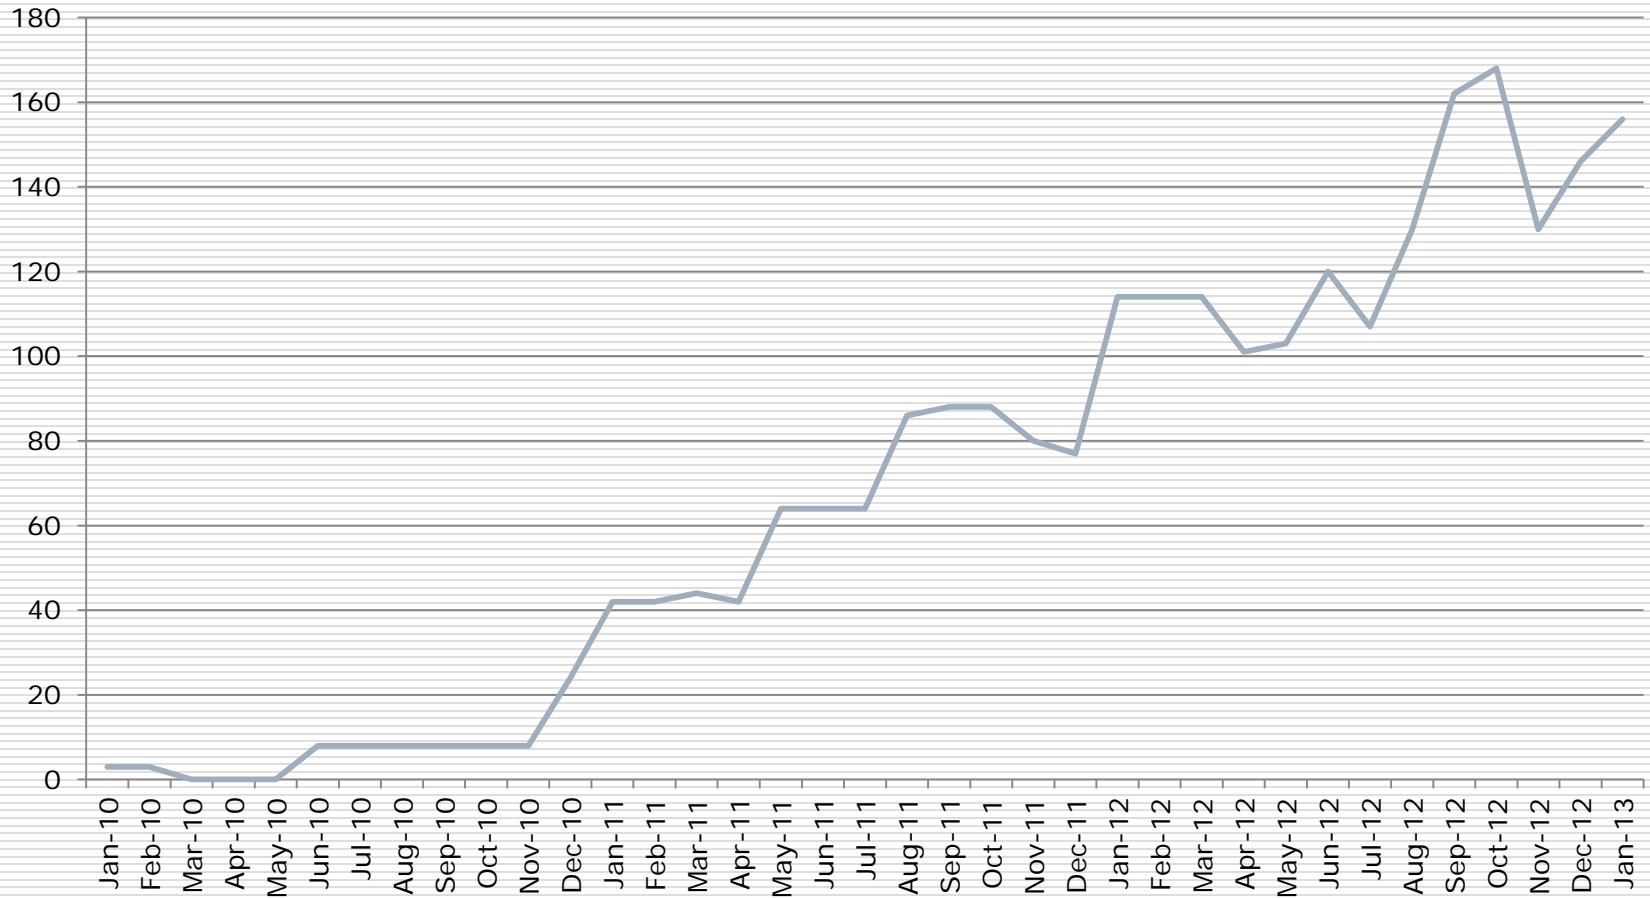

Number of participating countries

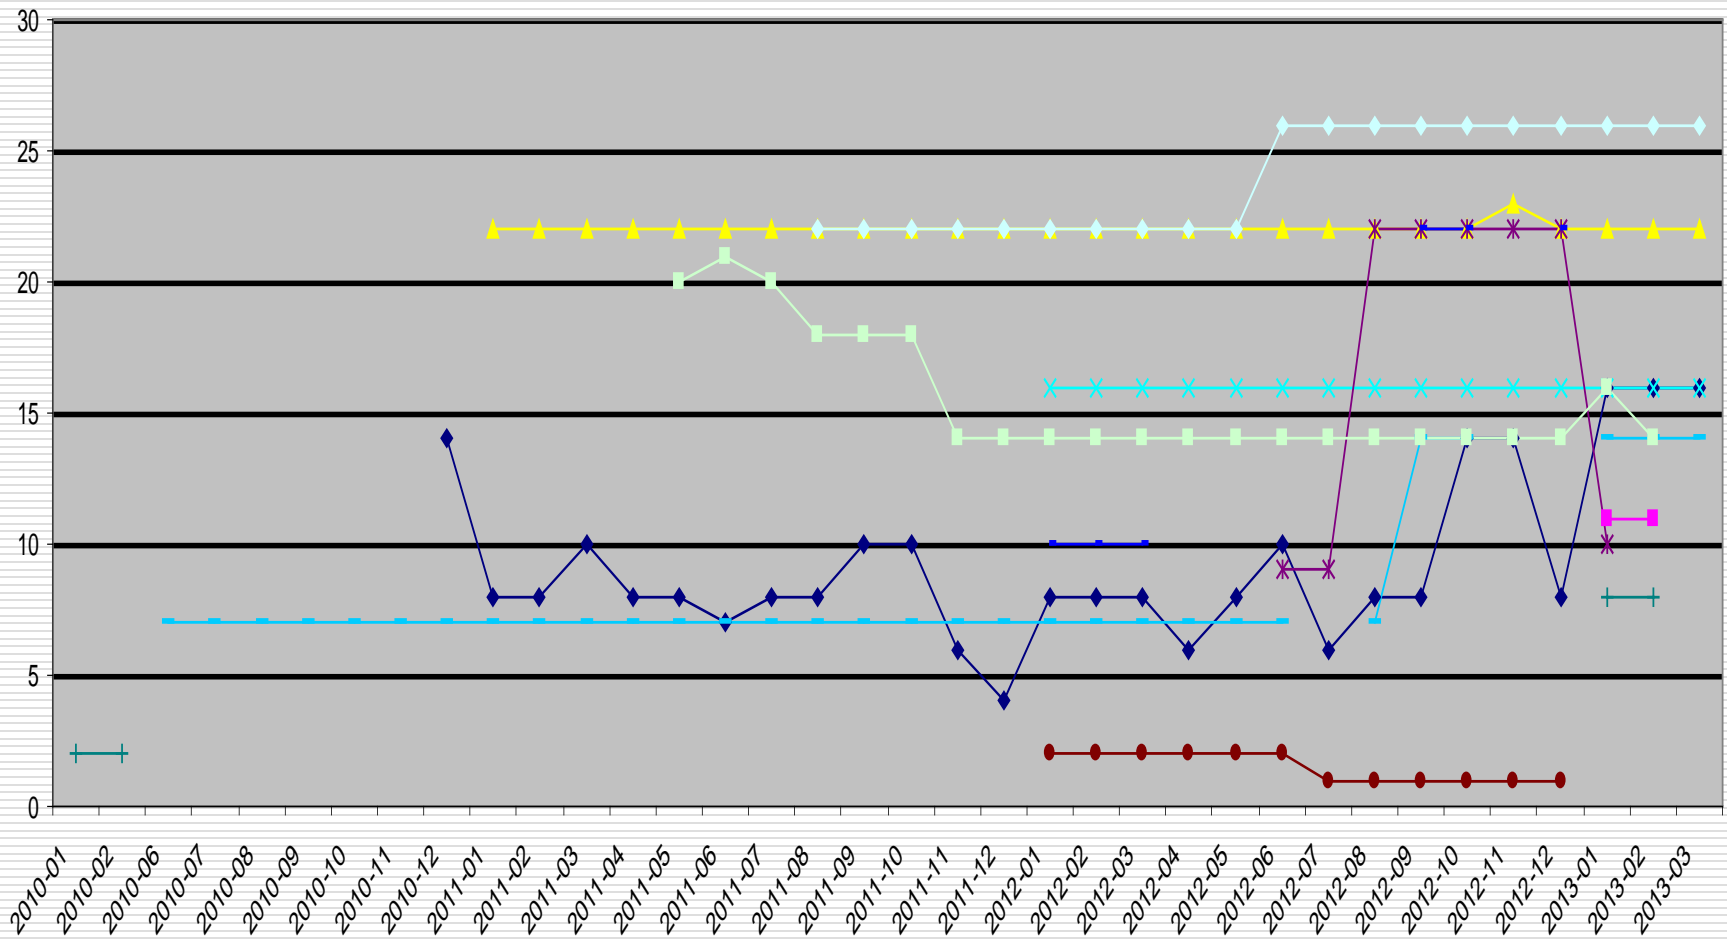

Number of data points reported

Data points per country

General remarks

- The number of participating countries is steadily increasing
- The completeness of the reported data is improving
 - E.g. countries previously submitting data on in m3 or TJ now report data in both units

Some challenges still remain

- Data gaps
- Measurement units/Conversion factors
- Timeliness
- Sustainability

We work very closely with countries to resolve these issues.

Initial findings from Beta Testing

- The JODI Gas database was circulated to countries reporting to UNSD to:
 - Review their data
 - Provide feedback on the database in general
- The feedback received from the countries was overall positive

..."the Beta JODI Gas database is wonderful."

Thank you
