

# The status of GAS JODI

*Assessment for IEA/OECD  
member countries*

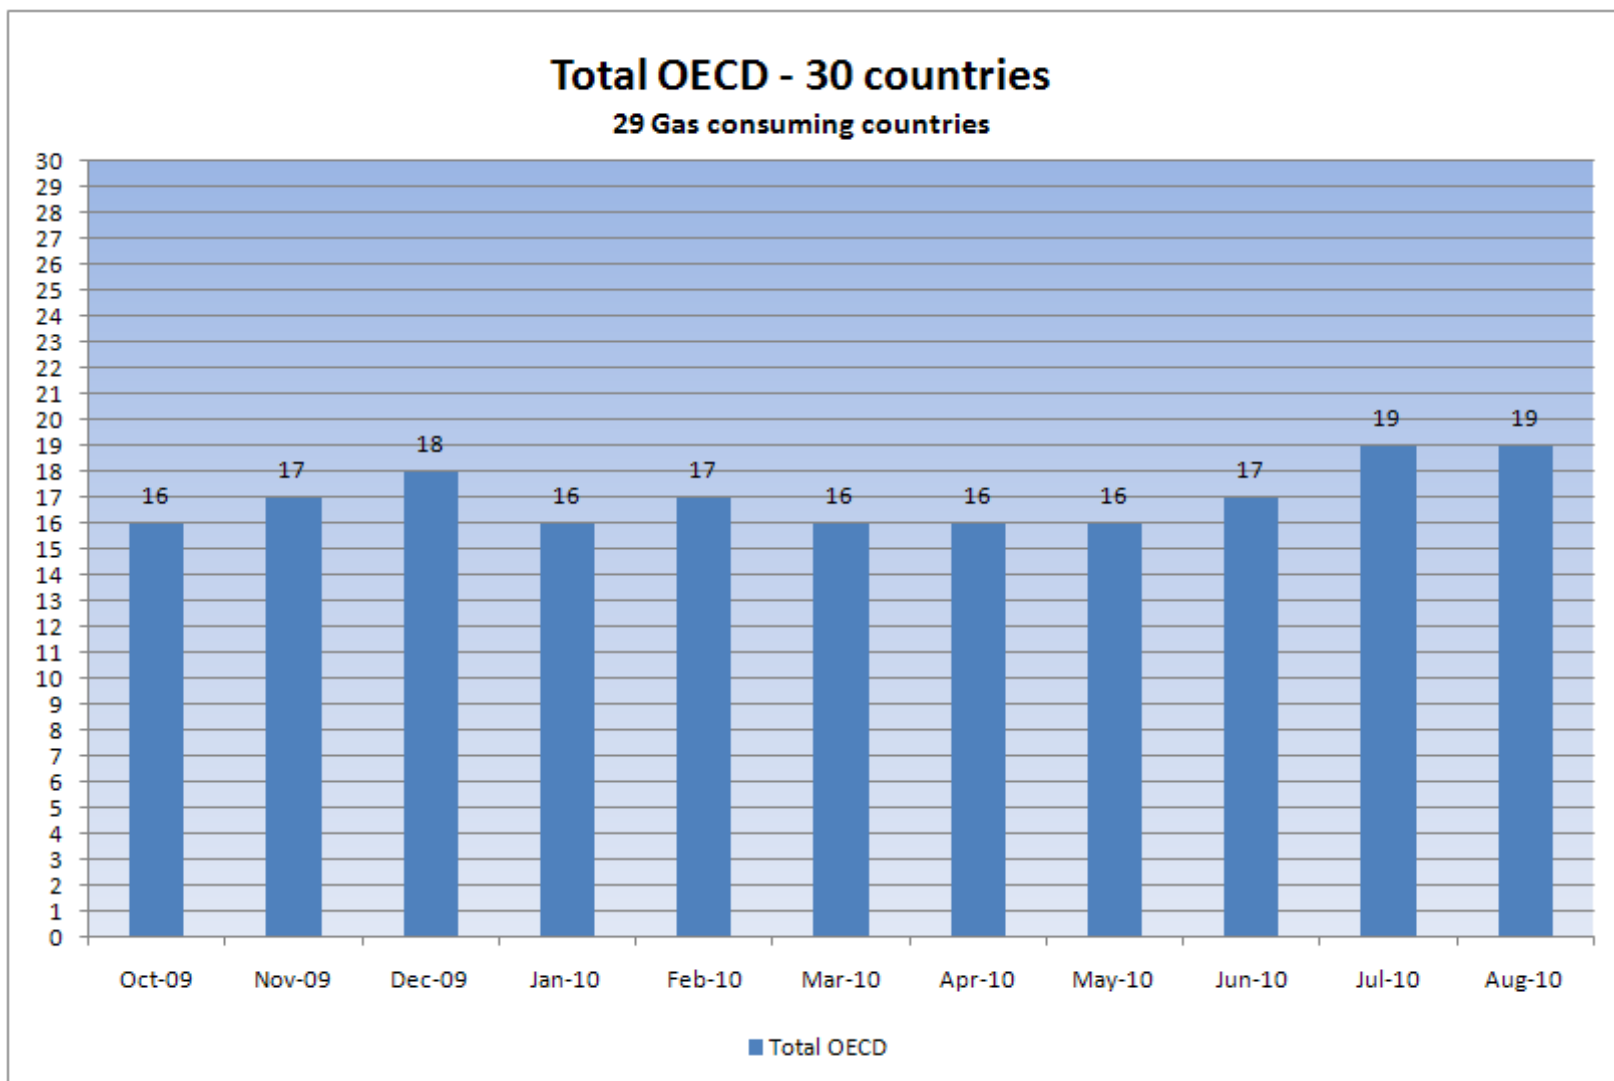

**Mieke Reece**  
*Energy Statistics Division*

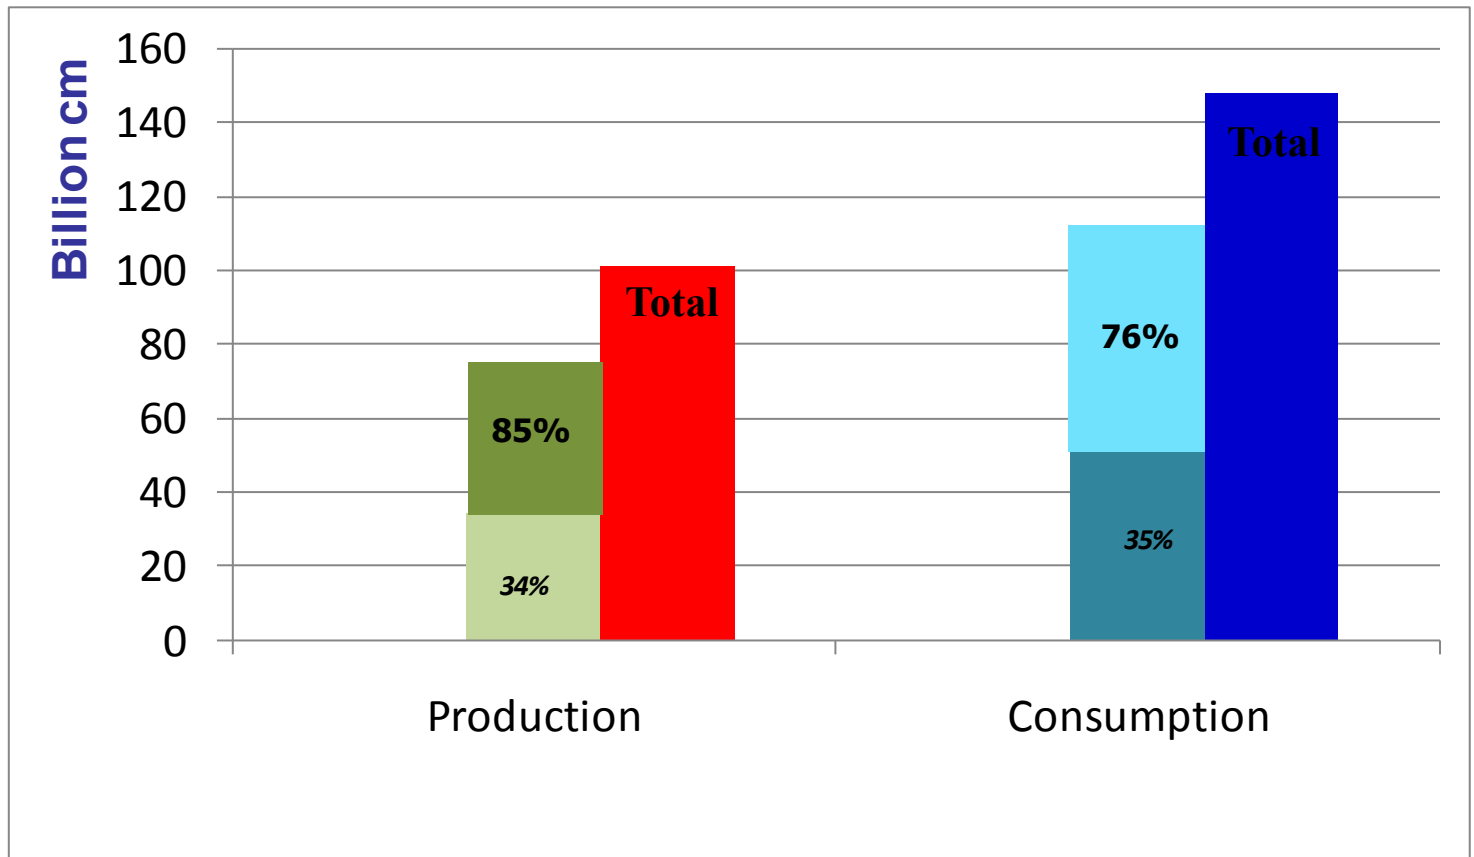

# IEA/OECD – Gas JODI data collection

- **Gas JODI – an exercise since October 2009**
- **Member countries were asked to volunteer in providing M-1 data on natural gas**
- **About half of the countries were reporting**
- **A reminder was sent in June 2010**
- **Since then, there is some increase in the number of countries submitting.**

# Gas Jodi for IEA member countries

# Coverage of participating countries

# The problems...

- **Current JODI gas data collection is an exercise.**
- **Testing the capability of countries to send monthly gas data. No obligation.**
- **Currently data is not processed at IEA due to lack of resources.**
- **Action has been taken and a possible increase in resources is expected from next year.**
- **Depending on the outcome and decisions of Inter Secretariat Jodi working group, a proposal could be made to the member countries to make it a permanent exercise.**

**Thank you**
